We are offering these masks to the US Government, all State Governors offices for their COVID-19 Task Forces, all US State Purchasing & General Services Divisions as well as to all Civil Servants. These masks are not available to the General Public. Masks must be ordered through a Government Agency, Fire Dept., City, Municipality, Hospital, Corporation or similar.

**Please help us spread the word. We kindly ask that you forward this information to your local Hospitals, State Government Offices, State Covid Task Force, Fellow Fire Dept's, Neighboring Companies.**

Our company is in the process of donating thousands of the KN95 masks to our local State of Utah Division of Purchasing & General Services. We encourage Corporations or Individuals wanting to donate masks to purchase them from us and we will ship them to the organization of your choice.

A liability release form must be signed and returned to us prior to the KN95 Masks being shipped. Shipping days may vary depending on final destination.

The World Health Organization recommends that all healthcare workers treating people with the virus wear surgical masks, along with gloves, goggles and gowns. Surgical masks are thought to be more effective in a clinical setting because they are accompanied by other protective equipment and stringent hygiene practices. The masks are also frequently replaced – surgical masks are not designed to be used more than once.

N95 respirators offer more protection. Such devices are designed to prevent 95% of small particles from entering the nose and mouth area. But they only work if they fit properly, and aren't suitable for children or people with facial hair. Kn95 & N95 masks are size adjustable.

SCBA Sales & Rentals LLC. reserves the right to cancel an order at any time until the order has been delivered for any reason and refund the customer in full.
